Cell Reproduction Section 3 Study Guide Answers

Reproduction describes the production of eggs and sperm and the processes leading to fertilization. The reproductive system consists of the primary sex organs, or gonads (testes in males and ovaries in females), which secrete hormones and produce gametes (sperm and eggs). Accessory reproductive organs include ducts, glands, and the external genitalia.

What Is Reproduction? - CliffsNotes Study Guides

Biol. 3 Study guide for test 3 (Organisms, Physiology ... In sexual reproduction, two parents each contribute a sex cells to the new organism. Half the genes In the offspring come from each parent. The offspring are not identical to the parent, but have a combination of both parents. Lesson 3 sexual and asexual reproduction Flashcards | Quizlet
