Describes what fingerprint analysts and DNA specialists do and the equipment that they use, relates the history of fingerprinting and DNA analysis, and discusses the role of fingerprint and DNA evidence in six real-life cases.

Describes what criminal profilers and forensic toxicologists do and the tools they use, relates the history of profiling and toxicology, and discusses their roles in six real-life cases.

Detailed accounts of over 30 contemporary cases, or older cases reopened as a result of advances in forensic science. Crime scene investigations draw on a wide range of cutting-edge technology including genetic fingerprinting, blood splatter analysis, laser ablation, toxicology and ballistics analysis. Cases covered here include: the abduction of Madeleine McCann, the vindication of Colin Stagg, convicted of having murdered Rachel Nickell; Hadden Clark who killed and ate a six-year-old child in Maryland; Robert Pickton, the Vancouver farmer who fed his female victims to his pigs; the murder of Meredith Kercher in Perugia (was Amanda Knox guilty?); Lindsay Hawker's gruesome death in Japan; Josef Fritzl and the cellar in which he imprisoned and raped his daughter.

The development of forensic science has fundamentally changed the way that crimes are solved and criminals caught. Starting from the principle that "every contact leaves a trace," Dr. Erzinçioğlu explains investigative techniques that until now have remained mysteries to the outsider. Chapters on poisons, alcohol and drugs, blood and body fluids, trace and contact evidence, ballistics, terrorism and forensic science, and more reveal the workings of a science that would cause even Sherlock Holmes to marvel.

Photographs and illustrations, along with case studies and interviews with forensic and police personnel, highlight a look at the art of forensic science and its applications in law enforcement.

You've solved crimes alongside your favorite TV shows-- but how real is their "real-life" science? Lyle takes you inside the world of forensics, and shows you how it's really done, from the crime scene to the crime lab, and into the courtroom.

Going behind the storylines of the blockbuster TV franchise C.S.I., a forensic psychologist and author of The C.S.I. Effect examines the real-life crimes that inspired some of its most popular episodes--from mass murderer Richard Speck to the massacre of Buddhist monks at their Arizona temple--as well as the cutting-edge investigative techniques used to solve the cases. Original.

Ten true stories of real-life crime scene investigators! A gold ring has been discovered at a murder scene, but police have little else to go on. Can State Patrol Investigator Richard Havel use that clue to track down the killers? A bomber is terrorizing a western community. What forensic clues can Investigator Jack Charles gather to stop and solve the bombings? Enter the secret world of crime scene investigators who use the latest forensic techniques to solve mysteries and bring criminals to justice. You will never forget these incredible true stories.
