Ctrl+Shift+Enter Mastering Excel Array
Formulas is not a book for beginners. It is
aimed for the advanced and expert users
and for those who want to move their
Excel skills to the next level. If you are a
beginner or intermediate user then I would
recommend you first learn the most
common Excel functions first before you
take the next step.

The reason is that after typing an array
formula into an Excel cell, you must press
Ctrl + Shift + Enter instead of just Enter.
By pressing Ctrl + Shift + Enter, Excel
adds the curly brackets { and } around the
formula. There are two types of array
formulas: The first type performs several
calculation steps and returns a single
value, called single-cell-array. The second

Online Library Ctrl Shift Enter Mastering Excel

Array Formulas type performs several calculations and returns values to a range of Excel cells, called multi-cell-array.
