The Federal  
Aviation

(FAA) has  
published the

Certification

document to  
communicate the  
aeronautical  
knowledge, risk

standards for the  
private pilot  
certification in the  
airplane category,  
single-engine land  
and sea; and  
multiengine land

This ACS incorporates and supersedes the previous Private Pilot Practical Test Standards for Airplane, FAA-S-8081-14. The FAA views the ACS as the foundation of its transition to a more integrated and systematic approach to airman

Certification. The ACS is part of the safety management system (SMS) framework that the FAA uses to mitigate risks associated with airman certification training and testing.

Specifically, the ACS, associated

# Access Free Experience

guidance, and test question components of the airman certification system are constructed around the four functional components of an SMS: Safety Policy that defines and describes aeronautical knowledge, flight proficiency, and

risk management  
as integrated  
components of the  
airman certification  
system; Safety Risk

processes through  
which internal and

evaluate regulatory  
changes, safety

and Safety

Promotion in the  
form of ongoing  
engagement with  
both external  
stakeholders (e.g.,

and FAA policy  
divisions. The FAA  
has developed this  
ACS and its  
associated

guidance in  
collaboration with a  
diverse group of  
aviation training  
experts. The goal is  
to drive a

components of the  
airman certification  
system, including

of collaboration, a  
hallmark of a

culture,  
strengthens and
