Read Fibula Free Flap Rui Fernandes Paperback - Ryobi 725r...

The fibula free flap (FFF) has become a widely accepted autologous reconstructive option for segmental mandibular defects after resections for cancer, benign tumors, trauma, or osteonecrosis. Advantages of this flap include the ability to repair soft-tissue composite defects, excellent bone length that can be shaped to fit the anatomical need, vascularized bone that resists resorption, suitability for dental implant placement and so allowing dental rehabilitation, and finally the ability to ...

Fibula - an overview | ScienceDirect Topics

Fibula Flap Harvest The patient is placed in the supine position with a bump under the ipsilateral hip to lessen the need for excessive internal rotation of the lower leg. Alternatively, the lateral decubitus position can be used, with the harvest leg placed up and the patient held in position with a beanbag.

Vascularized Fibula Flap - Microsurgeon.Org

Abstract In this article, four cases of free fibular osteocutaneous flap transfer are reported. The advantages of the bone?attached flap, its microsurgical anatomy, and its design and method of iso...

The study and clinical application of the osteocutaneous...

A fibular free flap is one way of filling a bony hole in either the upper or lower jaw. It is one of the common ways of replacing bone that has been removed for cancer treatment.

Fibular Free Flap | British Association of Oral and...

The major limitation of this flap is its associated skin flap, which has a variable blood supply and which may demonstrate viability issues in approximately 5% to 10% of cases. 41 The skin flap associated with the fibula may also not provide sufficient volume, area, or flexibility for more complex composite defects that require large volumes of soft tissue. The sacrifice of the peroneal artery should be well tolerated as long as the vascular anatomy and flow of the lower extremity and foot ...
