What is a Functional Specification Document?

Functional specification documents are mainly for developers, as they are going to be the ones who code your product to provide the ultimate solution for the user. That said, however, your functional specification document should be readable by everyone and accessible to everyone on your team, including the client.

Functional Specification Documents: your complete guide ...

In the world of software development, a functional specifications document is a set of guidelines that detail how a particular component of a software should function. It is different from a product requirements document (PRD) in that a PRD lists the features of a software. For example, a product requirements document might list “ user registration ” as a feature of a social app.
