The Wonder Weeks reveals what's going on inside baby's mind. Including a bonus chapter with everything about the relationship between sleep and leaps, as well as unique insight into your baby's sleeping behavior. The book includes: * Week-by-week guide to baby's behavior* When to expect the fussy behavior, what this implies (cranky, clingy, crying (the three C's) behavior) and how to deal with these regression periods (leaps)* A description from your baby's perspective of the world around him and how you can understand the changes he's going through* Fun games and gentle activities you can do with your child* Unique insight into your baby's sleeping behaviour The book is based on the scientific- and parental-world-changing discovery of a phenomenon: all normal, healthy babies appear to be more fussy at very nearly the same ages, regression periods, and sleep less in these phases. These age-related fluctuations in need for body contact and attention (regression periods) are related to major and quite dramatic changes in the brains of the children. These changes enable a baby to enter a whole new perceptual world and, as a consequence, to learn many new skills. This should be a reason for celebration, but as far as the baby is concerned these changes are bewildering. He's taken aback--everything has changed overnight. It is as if he has woken up on a strange planet. He needs you to guide him and understand what he is going through! Get ready to rediscover the world all over again with your baby... Bonus: Sleep, and the lack of sleep... that's something we all have to deal with when we have a baby. The bonus chapter includes everything about the relationship between sleep and leaps, as well as unique insight into your baby's sleeping behavior. Hint: did you know your baby learns (and there's a lot of brain activity) during those little, 'light' sleeps?

One kid's trash is another kid's terror in this spooky supernatural mystery. When Cassidy Bean leaves New York to spend the summer upstate, she's disappointed to find that Whitechapel is not the quiet, pleasant suburb she remembers. Ursula Chambers, the strange old hermit at the end of the cul-de-sac, has passed away under mysterious circumstances. And the townspeople are shocked to discover that Ursula was a hoarder: Her farmhouse is teeming with stacks of newspapers, piles of furniture, mounds of antique dolls and taxidermy animals. Cassidy watches as the people of Whitechapel descend upon Ursula's farmhouse, claiming her abandoned treasures for their own. She listens as rumors spread that Ursula's vengeful ghost is stalking the town with a warning from beyond the grave. And when

Cassidy resolves to uncover the truth behind the strangeness, she learns there are more bad things in the world than she ever suspected. . . . Modern master of the macabre Dan Poblocki is back with another scary story best read at night.

As a mother, Lisa Guernsey wondered about the influence of television on her two young daughters. As a reporter, she resolved to find out. What she first encountered was tired advice, sensationalized research claims, and a rather draconian mandate from the American Academy of Pediatrics: no TV at all before the age of two. But like many parents, she wanted straight answers and realistic advice, so she kept digging: she visited infant-perception labs and child development centers around the country. She interviewed scores of parents, psychologists, cognitive scientists, and media researchers, as well as programming executives at Noggin, Disney, Nickelodeon, Sesame Workshop, and PBS. Much of what she found flies in the face of conventional wisdom and led her to conclude that new parents will be best served by focusing on “ the three C ’ s ” : content, context, and the individual child. Advocating a new approach to television and DVDs, Guernsey focuses on infants to five-year-olds and goes beyond the headlines to explore what exactly is “ educational ” about educational media. She examines how play and language development are affected by background and foreground television and how to choose videos that are age-appropriate. She explains how to avoid the hype of “ brain stimulation ” and focus instead on social relationships and the building blocks of language and literacy. Along the way, Guernsey highlights independent research on shows ranging from Dora the Explorer to Dragon Tales, and distills some surprising new findings in the field of child development. Into the Minds of Babes is a fascinating book that points out how little credible research exists to support the AAP ’ s dire recommendation. Parents, teachers, and psychologists will be relieved to learn positive approaches to using videos with young children and will be empowered to make their own informed choices.
