NY City's brilliant and infallible Engage system has mandated that I be rated on a test the overwhelming majority of my students will not be taking. As far as I can determine, this is a side effect of the rather awful regulation called CR Part 154. You see, I'm an ESL teacher, but teaching ESL isn't real teaching.

First published in 1983, Understanding Student Learning provides an in-depth analysis of students' learning methods in higher education, at the time. It examines the extent to which these learning methods reflected the teaching, assessment and individual personalities of the students involved. The book contains interviews with students, experiments and statistical analyses of survey data in order to identify successes and difficulties in student learning and the culmination of these techniques is a clearer insight into the process of student learning.

Talks about coral reef systems and their relationship to the fish and other ocean life that inhabit them

In this brilliant work, the most influential philosopher since Sartre suggests that such vaunted reforms as the abolition of torture and the emergence of the modern penitentiary have merely shifted the focus of punishment from the prisoner's body to his soul.

This book provides practical information on the use of infrared (IR) spectroscopy for the analysis of materials found in cultural objects. Designed for scientists and students in the fields of archaeology, art conservation, microscopy, forensics, chemistry, and optics, the book discusses techniques for examining the microscopic amounts of complex, aged components in objects such as paintings, sculptures, and archaeological fragments. Chapters include the history of infrared spectroscopy, the basic parameters of infrared absorption theory, IR instrumentation, analysis methods, sample collection and preparation, and spectra interpretation. The authors cite several case studies, such as examinations of Chumash Indian paints and the Dead Sea Scrolls. The Institute's Tools for Conservation series provides practical scientific procedures and methodologies for the practice of conservation. The series is specifically directed to conservation scientists, conservators, and technical experts in related fields.
