Vollrath and Torgersen (2000) investigated the relationship of 8 'personality types', each characterized by a different combination of Extraversion, Neuroticism and Conscientiousness, to stress and problem-focused coping (altering the stressor), emotion-focused coping (regulating emotional distress associated with the stressor) and dysfunctional coping (synonymous with avoidance coping, although coping strategies such as venting may also be 'dysfunctional' in that the person does not ...

Occupational stress, coping and strain: The combined ...

with most research emphasizing personality traits or coping as a vulnerability/resistance factor (Wiebe & Smith, 1997). Personality is perhaps the more pervasive, in that it may influence stressor exposure, cognitive appraisal, coping, physiological reactivity and susceptibility to stress-related illness and disease (Code & Langan-Fox, 2001).

Occupational stress, coping and strain: The combined ...

Personality traits were found to be directly related to work-related stress, coping strategies, tension and burn out as well as negatively related to overall job satisfaction. Gender, age and rank did not show meaningful relationship with any of the endogenous variables.

Occupational Stress, Coping and Personality in the Police ...

RECENT FINDINGS: Studies among anesthesiologists are in concordance with the broader body of literature on this topic. Personality consistently influences stress appraisal and coping and consequently the development of burnout. Neuroticism, negative affectivity and cooperativeness all contribute to burnout.

Occupational stress, burnout and personality in ...

Biological and goal-based views of human nature provide an especially useful basis for construing coping; the five-factor model of traits adds a useful set of individual differences.

Coping—responses to adversity and to the distress that results—is categorized in many ways. Meta-analyses link optimism, extraversion, conscientiousness, and openness to more engagement coping; neuroticism to more disengagement coping; and optimism, conscientiousness, and agreeableness to less disengagement ...

Personality and Coping | Annual Review of Psychology

In addition to describing the process by which stress leads to mental and physical health problems, the ISR model proposes that each step in this process may be affected by characteristics of the individual (e.g., demographic characteristics, personality traits), as well as the interpersonal relations within the individual's work environment.

Stress Models and Theories - IResearchNet

personality and occupational stress, strain, and coping. The results revealed that the dancers were less educated than the musicians, a fact that can lead to problems with career transitions. Dancers also experienced greater occupational stress due to conflicting demands from their dance supervisors and unclear professional evaluations.

Personality and Occupational Stress in Elite Performers

Abstract. Models of occupational stress have often failed to make explicit the variable of control over the environment, as well as the role of job socialization in shaping personality characteristics and coping behaviours. This neglect has helped maintain the focus of stress reduction interventions on the individual.

Occupational Stress Personality Traits Coping Strategies

Knowledge on the quality of life (QOL) of civil servants is limited. Therefore, the aims of this study were to investigate the QOL of civil servants, and examine whether occupational stress and job satisfaction mediated the association between neuroticism and QOL in civil servants from Shandong, China. The cross-sectional study included 559 civil servants aged 27 to 60 years from Shandong ...

Mediating role of occupational stress and job satisfaction ...

Certain personality traits, openness, agreeableness and conscientiousness, were associated with problem-solving coping strategies such as active planning and reframing.

Personality, stress and coping in intensive care nurses: a ...

Furthermore, MS patients appear to be more exposed to a higher level of occupational stress, which might be linked to some personality characteristics. Our aim was to ascertain, by means of a longitudinal study, whether changes in occupational stress can be predicted by some personality traits, which could thereby become potential targets of therapeutic interventions.

Can personality traits influence occupational stress in ...

One hundred seventy-seven police officers and their spouses from two metropolitan areas completed separate questionnaires regarding stress and coping. Both the police and spouses reported using four coping activities in response to their own stressors: problem focused, emotion focused, religiosity, and rugged individualism.
