The Third Edition of ANSI/ACCA Manual D is the Air  
Conditioning Contractors of America procedure for sizing  
residential duct systems. This procedure uses Manual J  
(ANSI/ACCA, Eighth Edition) heating and cooling loads  
to determine space air delivery requirements. This procedure  
matches duct system resistance (pressure drop) to blower  
performance (as defined by manufacturer's blower  
performance tables). This assures that appropriate airflow is  
delivered to all rooms and spaces; and that system airflow is  
compatible with the operating range of primary equipment.  
The capabilities and sensitivities of this procedure are  
compatible with single-zone systems, and multi-zone (air  
zoned) systems. The primary equipment can have a multi-  
speed blower (PSC motor), or a variable-speed blower (ECM  
or constant torque motor, or a true variable speed
