Overview: On March 3, 2020, Anvisa published a new regulation “ RDC 340/2020 ” that classifies the changes made to approved medical devices in Brazil, into three categories, based on the level of risk they can present to their users. This regulation will take effect on April 1,2020. A summary of such classification is provided here below;

ANVISA NEW REGULATION FOR POST-APPROVAL CHANGES TO MEDICAL ...

Abstract. There are many reasons for making changes to pharmaceutical products after the original regulatory approval is obtained. Some of these changes may be significant and require a substantial amount of stability data while others are minor and may only require a stability commitment. Company change control procedures should detail how changes are evaluated and implemented as well as how the change impacts stability and what data will be needed to support the change.

Post Approval Change Regulations In Japan

In June 2010, FDA published a draft guidance on post-approval manufacturing changes to NDAs and ANDAs that "may be considered to have a minimal potential for an adverse effect on the identity, strength, quality, purity, or potency of the drug product and, therefore, may be classified as a change reportable in an annual report (e.g., notification of a change after implementation) rather than in a supplement." Specifically, the draft guidance provides a list of post-approval manufacturing ...

New post-approval changes of drug products. On March 22, 2016, the Brazilian Health Authority (ANVISA) approved the amendments of Regulation RDC 48/2009, which refers to the post-approval changes of drug products. The amendments establish a new regulatory framework for post-approval changes through the incorporation of different risk analysis depending on the complexity and the health risk of the modified drugs.
