A practical, bipartisan call to action from the world's leading thinkers on the environment and sustainability. Sustainability has emerged as a global priority over the past several years. investigates the wider cultural sphere of alternative and semi-official texts, broadcast media, reproductions of visual art and music, and, in the post-1989 period, new media. The underground circulation of uncensored texts in the Cold War era serves as a useful foundation for comparison when looking at current examples of censorship, independent media, and the use of new media in countries like China, Iran, and the former Yugoslavia.
