Description Now in its fifth edition, Housecroft & Sharpe's Inorganic Chemistry is a well-

respected and leading international textbook. This Solutions Manual accompanies the main text and provides model answers to the end-of-chapter problems, linking to relevant sections and figures in the main text as appropriate.

Now in its fifth edition, Housecroft & Sharpe's Inorganic Chemistry is a well-respected and leading international textbook. This Solutions Manual accompanies the main text and provides model answers to the end-of-chapter problems, linking to relevant sections and figures in the main text as appropriate. Solutions in this manual are fully worked, making them of maximum benefit to students during in-course assessment and end-of-course examination problems. Using the Solutions Manual will reinforce learning and develop subject knowledge and skills. The solutions are referenced into the literature and diagrams are simplified to coach students in how to achieve a similar style in their own work. Catherine E. Housecroft is Professor of Chemistry at the University of Basel, Switzerland. She is the author of a number of textbooks and has had teaching experience in the UK, Switzerland, South Africa and the USA. She has published around 500 research papers and reviews, and her current research interests include aspects of coordination chemistry associated with solar energy conversion, solid state lighting, water oxidation, porous coordination polymers and networks and hierarchical assemblies.

As you master each chapter in Inorganic Chemistry, having detailed solutions handy allows you to confirm your answers and develop your ability to think through the problem-solving process.

This solutions manual has been written to accompany Inorganic Chemistry 6th edition. It provides detailed solutions to all the self-tests and end of chapter exercises that feature in the sixth edition of the text. This manual is available free to all instructors who adopt the main text.

Inorganic Chemistry "Catherine E. Housecroft and Alan G. Sharpe" This book has established itself as a leading textbook in the subject by offering a fresh and exciting approach to the teaching of modern inorganic chemistry. It gives a clear introduction to key principles with strong coverage of descriptive chemistry of the elements. Special selected topics chapters are included, covering inorganic kinetics and mechanism, catalysis, solid state chemistry and bioinorganic chemistry. A new full-colour text design and three-dimensional illustrations bring inorganic chemistry to life. Topic boxes have been used extensively throughout the book to relate the chemistry described in the text to everyday life, the chemical industry, environmental issues and legislation, and natural resources. Teaching aids throughout the text have been carefully designed to help students learn effectively. The many worked examples take students through each calculation or exercise step by step, and are followed by related self-study exercises tackling similar problems with answers to help develop their confidence. In addition, end-of-chapter problems reinforce learning and develop subject knowledge and skills. Definitions boxes and end-of-chapter checklists provide excellent revision aids, while further reading suggestions, from topical articles to recent literature papers, will encourage students to explore topics in more depth. New to this edition Many more self-study exercises have been introduced throughout the book with the aim of making stronger connections between descriptive chemistry and underlying principles. Additional 'overview problems' have been added to the end-of-chapter problem sets. The descriptive chemistry has been updated, with many new results from the literature being included. Chapter 4 Bonding in polyatomic molecules, has been rewritten with greater emphasis on the use of group theory for the derivation of ligand group orbitals and orbital symmetry labels. There is more coverage of

supercritical fluids and 'green' chemistry. The new full-colour text design enhances the presentation of the many molecular structures and 3-D images. Supporting this edition Companion website featuring multiple-choice questions and rotatable 3-D molecular structures, available at "www.reasoned.co.uk/housecroft," For full information, including details of lecturer material, see the Contents list inside the book. A Solutions Manual, written by Catherine E. Housecroft, with detailed solutions to all end-of-chapter problems within the text is available for purchase separately ISBN 0131 39926 8. "Catherine E. Housecroft" is Professor of Chemistry at the University of Basel, Switzerland. She is the author of a number of textbooks and has extensive teaching experience in the UK, Switzerland, South Africa and the USA. "Alan G. Sharpe" is a Fellow of Jesus College, University of Cambridge, UK and has had many years of experience teaching inorganic chemistry to undergraduates
