Discover the power of putting things off: “ Insightful, sensible, and amusing ” (Harry G. Frankfurt, #1 New York Times – bestselling author of On Bullsh*t). This is not a book for Bill Gates or Steven Spielberg. Clearly they have no trouble getting stuff done. For the great majority of us, though, what a comfort it is to discover we ' re not wasters and slackers, but doers . . . in our own way. It may sound counterintuitive, but according to philosopher John Perry, you can accomplish a lot by putting things off. He calls it “ structured procrastination. ” Celebrating a nearly universal character flaw, The Art of Procrastination is a wise, charming, compulsively readable book—really, a tongue-in-cheek argument of ideas. Perry offers ingenious strategies, like the defensive to-do list (“ 1. Learn Chinese ”) and task triage. He discusses the double-edged relationship between the computer and procrastination—on the one hand, it allows the procrastinator to fire off work at the last possible minute; on the other, it ' s a dangerous time suck. Most importantly, he explores what may be procrastination ' s greatest gift: the chance to accomplish surprising, wonderful things by not sticking to a rigid schedule. “ John Perry is the wittiest philosopher since Marx (Groucho), and he brings to this book a delightful combination of wisdom and humor. ” —Thomas Cathcart, author of The Trolley Problem “ Reading this straight-talking, badly needed book has changed my life. ” —Bruce McCall, writer and illustrator for The New Yorker

What do these scenarios have in common: a professional tennis player returning a serve, a woman evaluating a first date across the table, a naval officer assessing a threat to his ship, and a comedian about to reveal a punch line? In this counterintuitive and insightful work, author Frank Partnoy weaves together findings from hundreds of scientific studies and interviews with wide-ranging experts to craft a picture of effective decision-making that runs counter to our brutally fast-paced world. Even as technology exerts new pressures to speed up our lives, it turns out that the choices we make – – unconsciously and consciously, in time frames varying from milliseconds to years – – benefit profoundly from delay. As this winning and provocative book reveals, taking control of time and slowing down our responses yields better results in almost every arena of life . . . even when time seems to be of the essence. The procrastinator in all of us will delight in Partnoy ' s accounts of celebrity “ delay specialists, ” from Warren Buffett to Chris Evert to Steve Kroft, underscoring the myriad ways in which delaying our reactions to everyday choices – – large and small – – can improve the quality of our lives.

"Krueger navigates the time and space of Le Spleen de Paris, treating Baudelaire's singular prose poem genre (both the individual pieces and their relationship to one another), demonstrating how poetry in prose provides a medium for Baudelaire's poetics of procrastination, hesitation, digression, and the killing of time (wasting it, nullifying it). Close readings reveal a convergence of narrative, temporal progression, and (would-be) linear movement in space, most often treated thematically in prose poems about travel, and echoed structurally in instances of repetition, intertextuality, and intratextuality." "The Art of Procrastination is applicable to Baudelaire scholars and their students in French and Comparative Literature, as well as to readers interested in cultural studies (particularly the cultural relativity of the experience of temporality), theories of literary genre, narrative and poetry."--BOOK JACKET.

DON'T WAIT TO READ THIS BOOK: The world's leading expert on procrastination uses his groundbreaking research to offer understanding on a matter that bedevils us all. Writing with humour, humanity and solid scientific information reminiscent of Stumbling on Happiness and Freakonomics, Piers Steel explains why we knowingly and willingly put off a course of action despite recognizing we'll be worse off for it. For those who surf the Web instead of finishing overdue assignments, who always say diets start tomorrow, who stay up late watching TV to put off going to sleep, The Procrastination Equation explains why we do what we do — or in this case don't — and why in Western societies we're in the midst of an escalating procrastination epidemic. Dr. Piers Steel takes on the myths and misunderstandings behind procrastination and motivation — showing us how procrastination affects our lives, health, careers and happiness and what we can do about it. With accessible prose and the benefits of new scientific research, he provides insight into why we procrastinate even though the result is that we are less happy, healthy, even wealthy. Who procrastinates and why? How many ways, big and small, do we procrastinate? How can we stop doing it? The reasons are part cultural, part psychological, part biological. And, with a million new ways to distract ourselves in the digitized world — all of which feed on our built-in impulsiveness — more of us are potentially damaging ourselves by putting things off. But Steel not only analyzes the factors that weigh us down but the things that motivate us — including understanding the value of procrastination.
