An inventory of information products and services available on the European Information Services Market. Points out the differences/advantages of the online database compared to the printed version which is in front of you.

International Electronics Directory '90, Third Edition: The Guide to European Manufacturers, Agents and Applications, Part 1 comprises a directory of various manufacturers in Europe and a directory of agents in Europe. This book contains a classified directory of electronic products and services where both manufacturers and agents are listed. This edition is organized into two sections. Section 1 provides details of manufacturers, including number of employees, production program, names of managers, as well as links with other companies. The entries are listed alphabetically on a country-by-country basis. Section 2 provides information concerning agents or representatives, including names of manufacturers represented, names of managers, number of employees, and range of products handled. A number of these companies are also active in manufacturing and so appear in both Section 1 and Section 2. This book is a valuable resource for private consumers.

Companion volume to Components and Sub-Assemblies Directory, providing access to 8000 manufacturers, agents and representatives of electronics systems and equipment. Entries include names of key managers, addresses, fax/telephone numbers, and pocket descriptions of manufacturing and sales programmes. There is also a product index to track the companies involved in any given business lines.

This book is the result of a collaborative research project involving the Centre for Defence and Security Studies at the University of Manitoba (Canada) and the Centre for Defence Economics at the University of York in England . Perhaps not surprisingly, given its transatlantic origins, its lineage is somewhat involved. In Canada , its origins can be traced to two earlier research projects on the political economy of arms production undertaken by members of what has since become the Centre for Defence and Security Studies . The first of these , carried out in collaboration with Toronto 's York University, and financially supported by the Centre for Studies in Defence Resources Management at the National Defence College in Kingston, Ontario , was entitled " The Implications of Europe 1992 For Canadian Defence and Defence Industrial Interests" . The second , undertaken in conjunction with both York University and Nova Scotia's Dalhousie University , was supported by the now defunct Canadian Institute for International Peace and Security , and dealt with " National Defence and the Canadian Economy . " Workshops were held in connection with both these studies, which brought together academic, governmental and industry experts in the field of defence production .
